## TO TEACHERS:

---

The object of this little book is to combine drill in spelling with graduated sight transcript practice for shorthand students. The words are arranged in accordance with the principles of Isaac Pitman's Shorthand Instructor (Twentieth Century edition) but are selected equally from the point of usefulness to the business correspondent and amanuensis. Words which represent exceptions to the regular rules or which have abbreviated forms, in shorthand, have been omitted. The entire list is divided into seven grades, lettered from A to G. A covers the principles through Exercise 11; B, through Exercise 19; C, through Exercise 29; D, through Exercise 37; E, through Exercise 47; F, through Exercise 54; G, through Exercise 63. Each grade, in turn, has three general divisions: At the beginning, one column of words is devoted to each principle of the grade; the middle portion consists of moderately difficult words in all the principles involved, to test the student's powers of discrimination; the last part of each grade contains quite difficult examples, which might be used as a final review, when all the principles of all the grades have been completed.

Students in any commercial course, who are not studying shorthand, may profitably use the book as a speller, and, to induce the "Dictionary habit," five words in each column are noted by an asterisk\* to be looked up and defined.
